Final Work Plan Available Site Sampling Started This Summer

The U.S. Environmental Protection Agency is working with Cascade Natural Gas Corporation towards cleaning up the Bremerton Gas Works Superfund site. The site is north of downtown Bremerton, along the Port Washington Narrows in Puget Sound. We're at the early stages of the Superfund cleanup process, called the "Remedial Investigation." At this stage, Cascade is conducting sampling to define the amount, types, and locations of contamination at the site. This summer, you may see workers at the site taking samples of sediments and soils. The [Final Remedial Investigation/Feasibility Study Work Plan](#) shows the number and types of samples Cascade will take, and sampling locations.
